

Nama : Misyhel Oktavia Br Nababan

Kelas : PW 1

Kampus : Universitas Methodist Indonesia

1. Buat Middleware menggunakan CLI

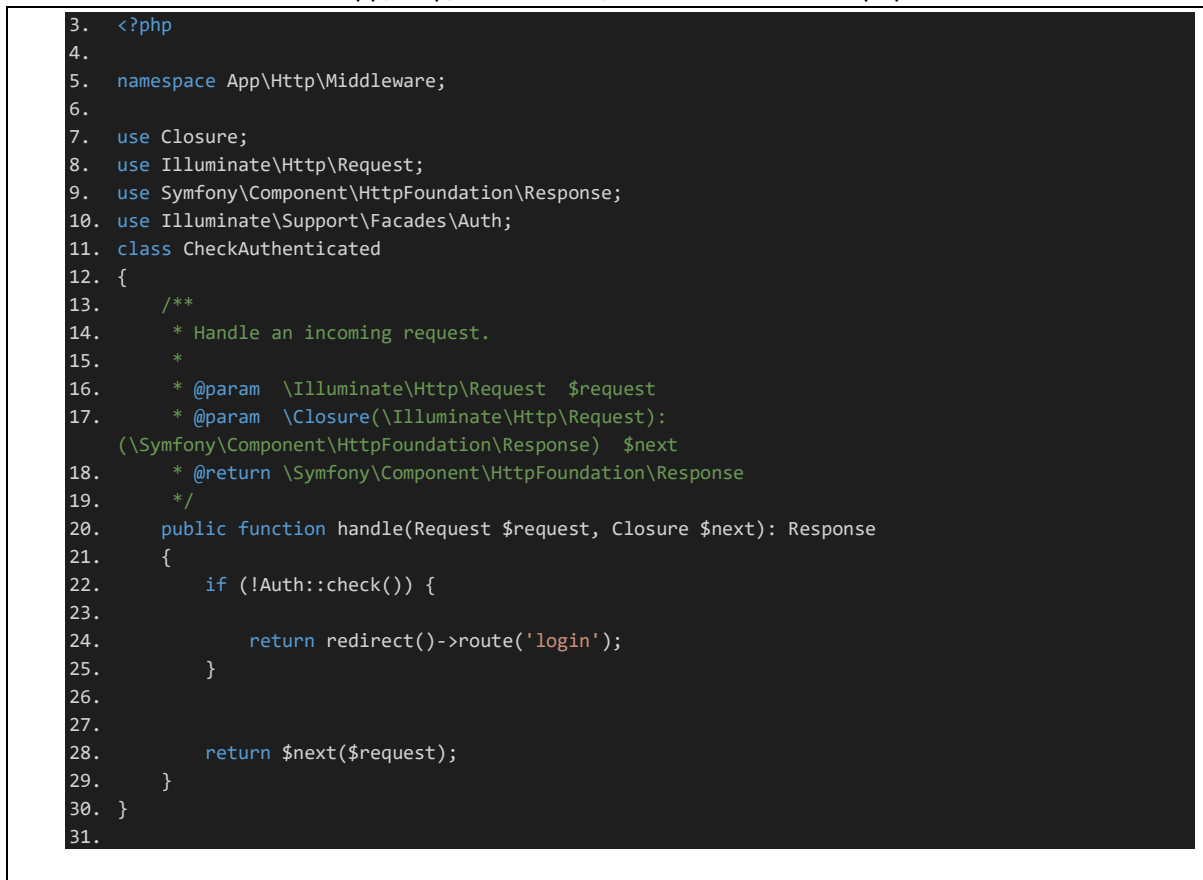

```
PROBLEMS OUTPUT DEBUG CONSOLE PORTS TERMINAL GIT LENS
PS C:\laragon\www\project6_perbaikan\jquery-project-misyhel\ecommerce> php artisan make:middleware CheckAuthenticated

ERROR Middleware already exists.

PS C:\laragon\www\project6_perbaikan\jquery-project-misyhel\ecommerce>
```

2. Membuat middleware di app/Http/Middleware/CheckAuthenticated.php

```
3. <?php
4.
5. namespace App\Http\Middleware;
6.
7. use Closure;
8. use Illuminate\Http\Request;
9. use Symfony\Component\HttpFoundation\Response;
10. use Illuminate\Support\Facades\Auth;
11. class CheckAuthenticated
12. {
13.     /**
14.      * Handle an incoming request.
15.      *
16.      * @param  \Illuminate\Http\Request  $request
17.      * @param  \Closure(\Illuminate\Http\Request):
18.      * (\Symfony\Component\HttpFoundation\Response)  $next
19.      * @return \Symfony\Component\HttpFoundation\Response
20.      */
21.     public function handle(Request $request, Closure $next): Response
22.     {
23.         if (!Auth::check()) {
24.             return redirect()->route('login');
25.         }
26.
27.         return $next($request);
28.     }
29. }
30. }
31.
```

3. Membuat middleware ke dalam route

```
<?php

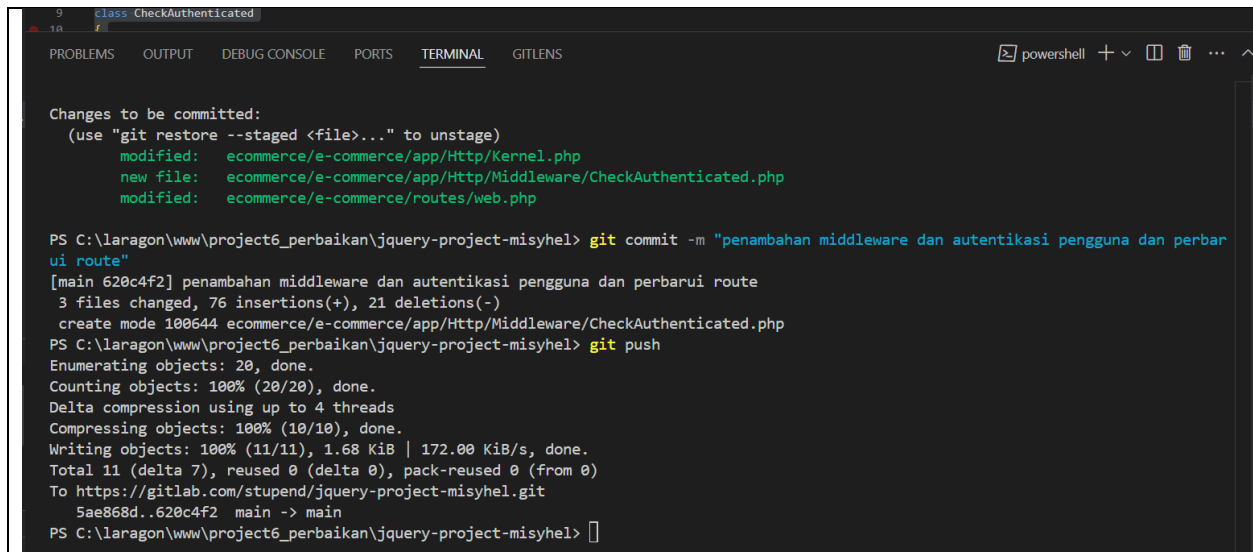

namespace App\Http\Middleware;

use Closure;
use Illuminate\Http\Request;
use Symfony\Component\HttpFoundation\Response;
use Illuminate\Support\Facades\Auth;
class CheckAuthenticated
{
    /**
     * Handle an incoming request.
     *
     * @param  \Illuminate\Http\Request  $request
     * @param  \Closure(\Illuminate\Http\Request):
     (\Symfony\Component\HttpFoundation\Response)  $next
     * @return \Symfony\Component\HttpFoundation\Response
     */
    public function handle(Request $request, Closure $next): Response
    {
        if (!Auth::check()) {

            return redirect()->route('login');
        }

        return $next($request);
    }
}
```

Lakukan update ke dalam repositori

The screenshot shows a VS Code editor with a file named `class CheckAuthenticated` open. Below the editor is a terminal window with tabs for PROBLEMS, OUTPUT, DEBUG CONSOLE, PORTS, TERMINAL, and GITLENS. The terminal is running a PowerShell session. It displays the output of `git commit -m "penambahan middleware dan autentikasi pengguna dan perbar ui route"`, showing a commit message and file changes. Then, it runs `git push`, showing the progress of pushing the commit to the remote repository.

```
9 class CheckAuthenticated
10
PROBLEMS OUTPUT DEBUG CONSOLE PORTS TERMINAL GITLENS powershell + - [x] [x] [x] [x] [x] [x]
